Dear Commission Staff,

I am a 40 year veteran of traditional commercial radio (engineer, dg, sales and GM).

Yet I urge you to reject the NAB's petition 04-160 limiting my choices on satellite radio. Commercial broadcasters use our airways free, yet are unable or unwilling to provide the diverse information and entertainment we deserve. That's why I pay to receive satellite radio.

Traditional broadcasters should spend their time improving their product, rather than banning certain new, innovative programming sources.

Sincerely,

Peter and Pamela Kern
